About us

ACO is one of the leading International Manufacturers of Building Drainage, External Drainage, Landscape Drainage Products and Oil & Grease Separators. ACO Range of Products are widely used in about 50+ Countries and have 32 manufacturing units located in various parts of Europe, UK, USA, Asia, Australia and is Head quartered at Rendsburg, Germany. For more details of ACO, you could also visit our website www.aco.in which would give you a broad idea about our organization and the product offerings.

Role Overview

The Application Engineer serves as a technical liaison between customers and the sales team, focusing on drainage solutions using ACO products. This role involves design, technical support, and coordination of projects.

Key Responsibilities

- Collaborate with the sales team and customers to identify needs and propose solutions.
- Design drainage layouts using AutoCAD and other design tools.
- Generate Bill of Quantities (BOQ) for quotations and site execution.
- Provide post-sales support to the sales team.
- Apply relevant Indian and EN standards in design and execution.
- Maintain accurate documentation of problem resolutions.
- Lead building drainage product solutions.
- Coordinate and support international and Indian projects.
- Conduct quality control and review of all building drainage approval drawings.
- Create and maintain product inventory (Revit and CAD) for ACO India products.
- Meet with consultants to discuss project requirements.
- Standardize product drawings for consistency and efficiency.

Desired Candidate Profile

- Diploma or BE in Civil / Mechanical.
- Proficient in drafting using AutoCAD.
- 0 to 5 years of experience in stormwater design.
- Proficient in MS Excel, Word, and PowerPoint.
- Intermediate skills in BIM/Revit.
- Strong command of written and spoken English.
- Self-motivated, energetic team player with a flexible and adaptable approach to work.
- Ability to multitask and work well under pressure.
