

Grease layer thickness measuring device

Product information

Used with

- Lipumax P

Description

- For electronic measurement of the grease layer
- Suitable for liquid and/or solidifying greases
- Analyser with ready to plug-in connection cable, length: 3 m
- With two floating changeover contacts for indicating full signal (100 %) and prewarning of the fill state (80 %)
- With visual display of the level for prewarning and full signal
- With heated probe rod for increasing operating reliability
- Operating voltage: 230 V/50 Hz
- Max. consumption approx. 12 W
- Cable length: 10 m
- Weight: 2 kg
